

Medi-Cal & HCR Monthly Update

Bureau of Program and Policy

2016 – 1st EDITION

IN THIS EDITION:

- **Medi-Cal Renewal Packets**
- **RFTHI/MC210 RV Renewal Packet**

Until further notice, you still cannot terminate a Medi-Cal case for:

- Failure to comply with the RE process; or
- Failure to provide during the RE process

Medi-Cal Renewal Packets

Medi-Cal (MC) has several Renewal (RE) packets that can be generated for beneficiaries during the annual RE process. The information below provides staff with a useful guide to determine which RE packet is needed for a specific program.

MAGI RE PACKET

MC 216 Pre-Populated Form

- The MC 216 is only generated when the e-hit is not compatible.
- The MC 216 does not need to be returned, as long as the verification requested in the MC 216 is provided by the MC beneficiary.
- The MC 216 is sent to MAGI eligible individuals under the Parent/Caretaker Relative, Adult, Children, and Pregnant Women categories.
- The MC 216 is issued to obtain verification of Income, Death, or Incarceration.

NON-MAGI RE PACKETS

MC 210 RV

- The MC 210 RV is a mandatory form that must be returned by the MC beneficiary.
- The MC 210 RV is sent to the Aged, Blind, Disabled, and Medically Needy individuals not eligible to MAGI MC.
- The MC 210 RV requests information related to income and property.

MC 262

- The MC 262 is a mandatory form that must be returned by the Long-Term Care (LTC) beneficiary.
- The MC 262 is issued to all LTC beneficiaries at RE.
- The MC 262 requests information related to income and property.

MC 14 A

- The MC 14 A is a mandatory form that must be returned by the beneficiary.
- The MC 14 A is issued to all MSP beneficiaries at RE.
- The MC 14 A requests information related to income and property.

Medi-Cal & HCR Monthly Update (cont.)

MIXED HOUSEHOLD RE PACKETS

A Mixed Household (HH) RE Packet is sent to MC households that contain both, MAGI and Non-MAGI aided individuals. Depending on the results of the e-HIT, the Mixed HH will receive one of the following RE packets:

If e-HIT is Compatible....

MC 604 IPS Only

- An MC 216 will not be generated. Eligibility was re-established through the e-HIT process for the MAGI individual(s).
- Only the MC 604 IPS will be sent to the HH for the Non-MAGI individuals.
- The MC 604 IPS must be completed and returned to comply with the annual RE for all HH members.

If e-HIT is Not Compatible....

MC 216 and MC 604 IPS

- Both MC 216 and MC 604 IPS will be mailed to the HH.
- The MC 216 does not need to be returned as long as the verification requested in the form is provided; however, the MC 604 IPS must be returned to complete the RE process for the HH.

⇒ Due to LEADER functionality, when a Mixed HH RE Packet is issued:

- LEADER will send an MC 210 RV instead of an MC 604 IPS.
- LEADER will send the MC 216 and MC 210 RV in separate packets.

⇒ LRS is programmed to send the MC 604 IPS, and will send the MC 216 and MC 604 IPS together in one packet.

MC 210 RV WITH RFTI RE PACKET

Individuals in cases that were converted from LEADER to LRS and have not had a MAGI eligibility determination, will be sent an RE packet that includes the MC 210 RV and RFTI form. This is an interim process that will be used for LRS in order to convert Pre-ACA cases to MAGI.

Reminder!

The RFTI is not a required form at RE; however, it is needed when a case has not had an initial MAGI eligibility determination.
